Cisco Spaces & Collaboration

Smart Spaces Suite: 5 New Apps

01 Digital Signage as a Canvas for Smart Spaces Outcomes

Explore, interact, and experience your spaces like never before. Visualize room & desk availability, equipment, as well as indoor air quality on AI-powered 3D maps on digital signages. Find a workspace (meeting room, desk) onsite and visualize the shortest path to a meeting room or desk on the signage.

02 Indoor Wayfinding for Effortless Navigation

Extend the signage experience to your mobile phones. Get turn-by-turn directions to available workspaces (meeting rooms, desks) and other points of interest – no mobile app download necessary.

03 Smart Rooms for Wellbeing & Sustainability

Every meeting room is intelligently aware of its occupants and environment, proactively and automatically adjusts ventilation. This provides a consistent level of air quality thereby boosting well-being and productivity. When the room is empty, air conditioning is optimized to save energy and meet ESG goals.

Smart Spaces Suite: 5 New Apps

04 Smart Desking: Find, Book & Check-In

Find, book and sign into a desk for the day from anywhere – on your mobile phone, from your home or on digital signages while you arrive at the office.

05 Space Utilization & Environmental Analytics for your Workplace Operations Center

Insights into utilization of buildings, floors, rooms and desks. With historical and real time occupancy data to reconfigure underutilized spaces, reduce ghost meetings, adjust layouts and optimize energy usage based on usage patterns. Insights into environmental trends at your workplace – air quality, temperature, humidity, CO2, ambient noise, etc.
